

## Intense Moist Cream

### Benefits

Intense Moist Therapy is an intensive treatment which delivers the dual benefits of emollients and moisturizers to protect and treat sensitive or very dry skin.

A combination of therapies is often preferred to treat eczema in order to target different parts of the eczema cycle. For example, emollient and cleansing products are commonly used as maintenance treatments

### MANUFACTURED IN SOUTH AFRICA

## INTENSE MOIST CREAM

Apply in the morning and evening on face after washing

### INDICATIONS

Emollient cream for body and face to relieve very dry skin and symptoms of eczema. It targets different parts of the eczema cycle and it has emollient, anti-pruritic (anti-itch) and anti-inflammatory properties.

### Active ingredients:

**Emollients** to prevent dryness.

**MSM** to reduce and prevent inflammation.

**Glycerine** a humectant to moisturise skin.

**Lanolin** to improve the condition of xerotic skin, reducing the signs and symptoms of dryness, scaling, cracks, abrasions, pain and itch.

**Safflower oil** contains linoleic acid an essential fatty acid.

**Saccharide isomerate** instant deep hydration for 72 hours, strengthens skin barrier function, more than 50% improvement in skin smoothness and softness and more than 50% reduction in flakiness and itchiness caused by dry skin after only 2 weeks application.

**Tea Tree oil** an antibacterial
