DIRECTIONS FOR USE:

Apply morning and evening after Serums, Capsules and Skin Protect Teenagers pm only

WARNING:

Sunburn Alert: These products contain an alpha hydroxy acid (AHA) that may increase your skin's sensitivity to the sun and particularly the possibility of sunburn, using sunscreens may reduce the risks of skin aging, skin cancer, and other harmful effects of the sun. Use a sunscreen with a minimum of 15 SPF, wear protective clothing, and limit sun exposure while using this product and for 4 weeks afterwards.

ACTIVE INGREDIENTS:

Glycolic acid: It is the only AHA which is able to penetrate through the cell walls by virtue of its small molecular size. Once inside the cell, it will trigger new formation of collagen and turn on the synthesis of dermal glycosaminoglycans to plump up the cell and the ground substances in the skin to reduce wrinkles on the skin. Glycolic Acid also affects the newly forming keratin cells at the bottom of the stratum corneum causing the bulk of the stratum corneum to lift off and separate from the underlying skin. This gives the skin a much smoother look and feel.

Emu oil: Contains gamma linoleic acids. It is natural anti-inflammatory, (non-comedogenic), help rejuvenate skin cells and stimulates the skin's immune system

Lipoic acid: Is the only antioxidant that is both fat and water soluble. This is important because Lipoic Acid can access all parts of the cell, giving it tremendous ability to trap free radicals wherever they may be. One of the leading causes of the symptoms we know as aging is free radical damage

INGREDIENTS: Aqua, Glycolic Acid, DMEA, Cetyl Alcohol, Isopropyl Palmitate, PEG-100 Stearate, Glycerin, Cyclomethicone & Dimethicone Copolyol, Glyceryl stearate & PEG 20 steareth, Lipoic acid, Dimethicone, Urea, Grapeseed Oil, Propylene glycol & diazolidinyl urea & methylpara ben & propylparaben, PPG-2 Myristyl Ether propionate.
