

## Skin Scripts WOW! Active Serum

### Benefits

- A serum with a difference.
- A dramatic reduction of fine lines, wrinkles, and the signs of aging
- Brightening and clarification of age spots, dullness and uneven pigmentation
- Peptides boost collagen synthesis, uniformise fibril diameter and spacing and inhibit enzymatic destruction.
- Skin will become soft and supple, even in tone, and regain its firmness
- Skin will become measurably thicker and more youthful in appearance
- Reduces puffiness around eyes.

**DRA PHARMACEUTICALS,  
Route 21 Corporate Park, Irene X 31,  
Centurion.**

**info@skinscripts.co.za**

**Apply twice daily after washing face with Refresh wash. Apply before any other skin treatment and leave to be absorbed completely.**

### Active ingredients:

**TRYLAGEN™** is a combination of active peptides and proteins that act at the three stages in the life of collagen and its activity is made up of three main functions:

Boosts collagen synthesis. Uniformises fibril diameter and spacing and inhibits enzymatic destruction.

**REGU-AGE™** is an active complex consists of specially purified soy and rice peptides, and biotechnologically produced yeast protein. *In Vitro* tests have shown a significant reduction in rate of blood clotting and improves oxygen supply to the tissue. Because the complex inhibits elastase and collagenases, it reduces the harmful effects of chronic UV radiation on connective tissue, to help the skin retain its natural firmness. Anti-inflammatory action gives visible reduction of puffiness around the eyes.

**MATRIXYL™** is a hydroglycolic solution containing lipopeptide, this molecule stimulates the skin fibroblasts in order to reconstitute the extracellular matrix: it leads to the synthesis of collagen I and IV, fibronectine and glycosamineoglycans. MATRIXYL is a revolutionary ingredient to treat wrinkles and is a remarkable alternative to retinol and vitamin C.

**BIOPEPTIDE CL™** is a messenger peptide for collagen renewal and has "Retinoic acid-like" activity without irritancy. It stimulates collagen and glycosaminoglycan synthesis, its activity stands comparison with retinoic acid and is thus recommended for the restructuration of dermal matrix (firming and anti-wrinkle action), because of the protein and glycan neosynthesis, skin grows thicker, firmer and wrinkles become smoother. The production of extracellular matrix also protects skin against UV rays.

### Other ingredients

Aqua, Acrylates/C10-30 Alkyl Acrylate Cross-polymer, Benzyl alcohol & dihydroxyacetyl acid.
