Directions for use: After shampoo and conditioning, towel dry hair. Spray 5 to 10 sprays on the area where the hair is thinning. Can also be used as a general booster for hair. Do not rinse hair after application. Dry and style hair as usual. Apply at least twice per week.

Active Ingredients:

Copper peptide (GHK-Cu) stimulate hair growth in a number of ways:

- Topical application of copper peptides to the scalp has been shown to strengthen existing hair and stimulate growth.
- Copper peptides have been proven to improve the results of hair transplants.
- A wide range of tests has shown the molecule to play a role in hair growth in animals, human cancer patients and healthy humans.

It is thought that the role of copper in our bodies includes fighting inflammation, and that it could be that we age – our skin starts to wrinkle, our hair thins and we become weaker – due to the depletion. It seemed that the copper peptide played a role in preventing follicle death and even increasing their size.

Biotinoyl tripeptide-1 is a Matrikine acting on the anchoring of the hair thanks to adhesion proteins. dihydrotestosterone via 5 α -reductase and thus may be advantageously used in the treatment of hair loss. It is effective in reducing hair loss and increasing hair fibre production. With positive effects on the hair follicle, Biotinoyl Tripeptide-1 helps scalp micro-circulation and follicle atrophy caused by dihydrotestosterone, and follicle aging.

Witch Hazel :The same properties that make witch hazel beneficial to the skin also make it good for the hair and scalp. It is a natural astringent that contains antioxidants and tannin, which can help diminish oil production not only on the face, but also on your head. So if you tend to have a greasy scalp and want a natural way to cut through the oil, witch hazel is your new ally.

MSM is an organic sulfur has also been shown in studies to help extend the body's natural hair growing cycle, a stage known as the 'Anagen' phase. As we age, the Anagen stage in the hair growth cycle reduces, giving our body less time to thicken, strengthen and regrow hair.

Urea is included for its anti-fungal, anti-microbial qualities and because of its ability to act as a moisturizer for dry, rough, cracked and flaky skin.

Licorice extract topical application is known to be beneficial for hair growth. It traps the essential moisture in the scalp, paving way for the lush growth of hair follicles.

Valine is a branched-chain amino acids (known as BCAA) and is one of the three main components of potassium ion channels found in human hair follicles. Men and women experiencing hair loss have hair follicles that are deficient with regard to potassium ion channels

L-Arginine, is a amino acid that works to slow hair loss, It is often used in the treatment of male pattern baldness in the form of a topical application that promotes healthy hair growth.

L-Cystine is an amino acid and a building block of keratin and therefore is essential for hair production
